Description

Data for this study were collected using a multiform assessment method at the Harvard Psychological Clinic by a team of research investigators led by Murray. The purpose of this research was to further understand personality by combining the use of standardized tests and projective measures with intensive study of social interaction, responses to stress, and memory.

Five groups of approximately 20 men from each of the Harvard College classes of 1942, 1952, 1955, 1959, and 1962 were studied. The men participated in intensive testing beginning as sophomores and continuing through their senior years. Each participant committed about 200 hours to the project over the course of three years.

The Murray Research Archive holds complete dossiers on all five groups of men who participated in this intensive, longitudinal research project. Life history data include lengthy, detailed autobiographies, statements of philosophical beliefs and values, college transcripts, and personal interviews. A variety of ratings including behavioral variables, psychological types, values, special abilities, and other personality tests and inventories are available for each participant. Rorschach tests, drawings, and responses to a number of Thematic Apperception Test (TAT) cues are among the projective data in this study. Each participant also participated in dyadic interaction sessions, from which observations, recalls, reactions, and perceptions were recorded. These extensive interaction data are available as well. Analyses of each case by Murray and his colleagues accompany the original record paper data. The paper data for this study have been digitized and are available for use (pending approval of Application to Use data

form by the Director of the Archive).

Audio Data Availability Note: This study contains audio data that have been digitized but are unavailable for use. There are 10 audio files available.

Video Data Availability Note: Video data are available for this dataset, but not available for use.

Paper Data Availability Note: Dicker and Commitless interviews need to be de-identified. All scrolls need to be de-identified. Not available for use.

Subject "Lawful" Data Availability Note: Data unavailable until subject is deceased.

License/Data Use Agreement

Our Community Norms as well as good scientific practices expect that proper credit is given via citation. Please use the data citation shown on the dataset page.

Custom Dataset Terms — the following Custom Dataset Terms have been defined for this dataset.

Terms of Use

- The Murray Archive (the Distributor) has granted me a revocable license to use this dataset solely for the purposes of conducting research, and the Distributor may terminate this license at any time and for any reason.
- I will use the dataset solely for statistical analysis and reporting of aggregated information, and not for investigation of specific individuals or organizations, except when identification is authorized in writing by the Distributor.
- I will produce no links among the Distributor's datasets or among the Distributor's data and other datasets that could identify individuals or organizations.
- I represent that neither I, nor anyone I know, has any prior knowledge of the possible identities of any study participants in any dataset that I am being licensed to use.
- I will not knowingly divulge any information that could be used to identify individual participants in the study, nor will I attempt to identify or contact any study participant, and I agree to use any precautions necessary to prevent such identification.
- I will make no use of the identity of any person or establishment discovered inadvertently. If I suspect that I might recognize or know a study participant, I will immediately inform the Distributor, and I will not use or retain a copy of data regarding that study participant. If these measures to resolve an identity disclosure are not sufficient, the Distributor may terminate my use of the dataset.
- I will not reproduce the dataset except as is necessary for my scholarly purposes. I will destroy the dataset upon the completion of my scholarly work with it.
- I will not share data from the dataset (in any form or by any means) with any third party, including other members of my research team, as I understand that all users of data must obtain the data directly from the Distributor.
- I will make appropriate acknowledgement of the contributor of the dataset as well as the Distributor in any manuscript or presentation (published or unpublished) using the citation standard documented here: <http://thedata.org/citation>

- THE DISTRIBUTOR MAKES NO WARRANTIES, EXPRESS OR IMPLIED, BY OPERATION OF LAW OR OTHERWISE, REGARDING OR RELATING TO THE DATASET.

Special Permissions

Submission of the following Application For The Use Of Data is required to access the data from this study.

Restrictions

I will use these data solely for the purposes stated in my application to use data, detailed in a written research proposal. I will honor all agreements and conditions made between the Contributor of the Data and the study participants, and between the Contributor of the Data and the Henry A. Murray Research Archive, Harvard University, as specified in the Memorandum of Agreement.

Citation Requirements

I will include a bibliographic citation acknowledging the use of these data in any publication or presentation in which these data are used. Such citations will appear in footnotes or in the reference section of any such manuscript. I understand the guideline in "How to Cite This Dataset" described in the Summary of this study.

Depositor Requirements

Murray Research Archive will list my publication and manuscripts on the Archive website when I submit a bibliographic citation or title of the manuscript, and indicate the Henry A. Murray Research Archive data used. Doing this will also help Henry A. Murray Research Archive to provide funding agencies with essential information about use of archival resources, to fulfill requirements of some memoranda of agreement, and to promote the broader exchange of information about research activities.

Conditions

All applications for follow-up will be reviewed and considered by a screening committee and must be approved by Harvard's IRB.

All applications for video and audio data, once available for use, will be screened by Harvard's Institutional Review Board for approval.

The data can only be used for research purposes.

Restricted Files + Terms of Access

Restricted Files

There are 248 restricted files in this dataset.

Terms of Access for Restricted Files

Submission of the following Application For The Use Of Data is required to access the data from this study.

All applications for follow-up will be reviewed and considered by a screening committee and must be approved by Harvard's IRB.

All applications for video and audio data, once available for use, will be screened by Harvard's Institutional Review Board for approval.

The data can only be used for research purposes.
